

Application for ecSatter Inventory (ecSI 2.0™)

As stated in the usage protocol, permission to use ecSI 2.0™ is reserved for research education or clinical practice. Of special interest are validation studies, especially for non-English translations and testing of a clearly defined clinical or educational interventions. When submitting the online application please provide a succinct project description following the guidelines below.

ecSI 2.0™ Use	Project Description Guidelines
Research	<ul style="list-style-type: none"> ▪ What is the research question? ▪ What population will be studied? ▪ What is the role of the ecSI 2.0™ in this study? ▪ What is the planned sample size and power analysis? ▪ What strategies will be used to recruit subjects? ▪ What instruments or measures will be included in addition to the ecSI 2.0™ ? (Include any psychometric, nutritional, physical, metabolic, and psychological tests.)
Clinical Practice	<p>Approved interventions are those developed by Ellyn Satter and taught in by the Ellyn Satter Institute. Interventions apply the Satter models, specifically, the <i>How to Eat</i> intervention and the <i>sDOR secondary intervention</i>.</p> <p>THE DISTINCTION BETWEEN CLINICAL AND EDUCATIONAL INTERVENTION IS MADE ON THE BASIS OF ASSESSMENT AND TREATMENT PLANNING. UNLIKE EDUCATIONAL INTERVENTION, CLINICAL USE INCLUDES INDIVIDUALIZED ASSESSMENT AND TREATMENT PLANNING.</p>
Educational Intervention	<ul style="list-style-type: none"> ▪ What is the educational setting (e.g. WIC, Head Start, university, extension, primary health care)? ▪ What is the target audience (e.g., professionals or other staff, participants, students)? ▪ Indicate ages of the target audience. ▪ What is the course or program title? ▪ Explain the scope and focus of the curriculum. Be concrete, i.e. what do you mean by non-dieting, healthy eating, food plans, nutrient focus, etc. ▪ Indicate that you will NOT be using the ecSI 2.0™ as part of the course content, i.e. teaching to the test. <p>THE DISTINCTION BETWEEN CLINICAL AND EDUCATIONAL INTERVENTION IS MADE ON THE BASIS OF ASSESSMENT AND TREATMENT PLANNING. UNLIKE EDUCATIONAL INTERVENTION, CLINICAL USE INCLUDES INDIVIDUALIZED ASSESSMENT AND TREATMENT PLANNING.</p>
Human Subjects Review	<ul style="list-style-type: none"> ▪ What are your plans for human subjects review? What agency will you approach for this review?
