

## Protocol for the Use of the sDOR.2-6y™

Thank you for your interest in the sDOR.2-6y™ survey to measure adherence to the Satter Division of Responsibility (sDOR) in Feeding. Use of this survey is available to projects that contribute toward developing and examining the instrument or furthering the study of the sDOR framework. Permission to use the survey requires that the project is conducted so that it neither conjures false support nor encourages unfounded dismissal of sDOR. You can visit the Ellyn Satter Institute [to learn more about sDOR](#).

Example of possible projects include the following:

- Surveying sDOR in specific populations and or validating sDOR.2-6y™ within specific populations, such as Spanish-speaking populations, disabled people, or parents living with chronic diseases, such as diabetes.
- Large-group surveys that correlate sDOR.2-6y™ with other biomedical parameters such as BMI or nutritional status, or psychosocial indicators of health.
- Using sDOR.2-6y™ to measure the impact of a clearly defined education model or clinical intervention.

Gaining permission requires completing an application. Upon application approval, you will receive the survey and usage guidelines. Once approved we will include you in a community of educators, practitioners, and researchers with expertise in sDOR.

**In summary, here is the process for gaining permission to use sDOR.2-6y™.**

1. Review the [application guidelines](#).
2. Submit your application. The application link is at the bottom of the application guidelines document.
3. Respond to any questions and/or comments that you receive from our review of your application.
4. Once approved, you will receive the survey. Download and use the survey as outlined in your proposed project.
5. After your project is completed, prepare a NEEDs Center [confidential outcomes report](#).
6. We appreciate your sharing any publications or presentations based on your project with the sDOR.2-6y™ community with this [form](#).
